

Corporate Overview

[Applied Geographics, Inc.](#) (AppGeo) believes that information referenced to geography empowers governments, citizens and businesses to operate with greater efficiency, deliver improved services, and make better decisions. Since 1991, AppGeo has focused on helping customers expand their use of location intelligence (LI) and build geospatial IT organizational capacity. Since 2014, AppGeo has been a Google Premier Partner for Google Maps and Cloud Platforms, with a Location-Based Services Specialization. AppGeo staff have over 30 certifications for Google Maps and Cloud sales and service.

Our strategic relationship with Google enables us to offer the best mapping and cloud platforms and spatial data resources in the marketplace today for several focus areas.

Transportation	Public Safety	Energy & Environment
<ul style="list-style-type: none"> Routing and Logistics Roadway Conditions Roadway Characteristics Right-of-Way Data Mgt HPMS / MIRE Reporting 	<ul style="list-style-type: none"> Flood Forecast / Warning NG911 Data Management NG911 Standards Broadband Mapping Fire Incident Mapping 	<ul style="list-style-type: none"> Land Management Flood Data Management Wildlife Management Imagery Content Programs Utility Mapping

We provide professional services related to Google Maps for API consulting, geospatial data management and governance, strategic planning, and application development/hosting. For example, AppGeo developed and hosts the DriveTexas Traveler Information System for Texas DOT to present road and traffic conditions for thousands of miles of roads updated in 5-minute intervals.

“Empowering people with spatial solutions for 30 years”
