

# MapGeo

## Dashboard

Configure every component of your MapGeo site

- Set-up and publish map layers
- Manage user login credentials
- Edit user based security including opt-outs and available property info
- Modify the branding and messaging of your site
- Set up links to external business systems
- View site feedback
- Upload new versions of data

MapGeo Dashboard City of Albany Basemaps + Add New Basemap

Note: Make sure to publish and set a default basemap to override the old basemaps, which are now deprecated. New communities will have custom basemaps setup by default, but ones pre-dating custom basemaps will default to what was setup before.

Name	Default	
Google Road	Yes	Unpublish
Google Hybrid		Unpublish
Google Terrain		Unpublish
Google Satellite		Unpublish
USGS TNM Topo BaseMap		Unpublish
2015 Aerial Imagery		Publish

## Training and Support Included

To get started, the MapGeo team will provide a 1-on-1 training session for the Dashboard, using real changes you want to your MapGeo as the foundation for your learning. 4 hours of annual dashboard configuration assistance comes with the purchase and additional assistance can be made available as needed.

# Configuration Tools

The MapGeo Dashboard provides a full range of configuration tools for MapGeo. Anything that can be changed on your MapGeo site can be modified within the Dashboard. User level security allows you to configure how different roles view your MapGeo site.
